This information should not be considered as a recommendation to purchase or sell a particular security and the holdings or countries mentioned may change at any time and may not represent current or future investments.

The Fund charges a redemption fee of 2.00% on redemption of shares that are held for less than 60 days.

Over time, a growth oriented investing style may go in and out of favor, which may cause the Fund to sometimes underperform other equity funds that use different investing styles.

Investing in international and emerging markets poses special risks, including potentially greater price volatility due to social, political and economic factors, as well as currency exchange rate fluctuations. These risks are more severe for securities of issuers in emerging market regions.

Equity securities, such as common stocks, are affected by company specific events and by movements in the overall stock markets in which those securities principally trade. An adverse company specific event, or downturn in those stock markets, can depress the value of a particular company's equity securities.

Due to rounding, percentages may not sum to totals shown.
