The performance figures assume the reinvestment of dividend and capital gain distributions. Returns for periods less than one year are not annualized. Performance data shown represents past performance which is no guarantee of future results. Current performance may be higher or lower than the past performance data shown. Investment returns and the value of an investment will fluctuate, and an investor's shares, when sold, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end (available within seven business days of the most recent month-end) by calling 800-422-1050 or visiting harborfunds.com.

Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or prospectus for this and other information about the Fund, visit harborfunds.com or call 800-422-1050. Read it carefully before investing.

About Expense Ratios: All mutual funds have expense ratios which represent what shareholders pay for operating expenses and management fees. Expense ratios are expressed as an annualized percentage of a fund's average net assets paid out in expenses. Net expense ratios reflect adjustments due to voluntary or contractual fee waivers or expense reimbursements. Expense ratio information is as of the Funds' current prospectus, as revised and supplemented to date. From time to time, certain fees and/or expenses have been voluntarily waived, which has resulted in higher returns. Without these waivers, the returns would have been lower. Please keep in mind that as a result of changing market conditions, total asset levels and other factors, expenses at any time during the current fiscal period may differ from those shown.

(a) Voluntary. Waivers may be discontinued at any time without notice, although the adviser has no present intention to do so.

(b) Contractual expense limitation until 02/28/2013.

(c) Contractual management fee waiver until 02/28/2013.

(1) Investing in international and emerging markets poses special risks, including potentially greater price volatility due to social, political and economic factors, as well as currency exchange rate fluctuations. These risks are more severe for securities of issuers in emerging market regions.

(2) Equity securities, such as common stocks, are affected by company specific events and by movements in the overall stock markets in which those securities principally trade. An adverse company specific event, or downturn in those stock markets, can depress the value of a particular company's equity securities.

(3) Stocks of small and mid cap companies pose special risks, including possible illiquidity and greater price volatility than stocks of larger, more established companies.
