* Non-income producing security

- Securities purchased in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. The Fund has no right to demand registration of these securities. At January 31, 2021, the aggregate value of these securities was \$2,372 or 6% of net assets.
- Depository receipts such as American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) and other country specific depository receipts are certificates evidencing ownership of shares of a foreign issuer. These certificates are issued by depository banks and generally trade on an established market in the U.S. or elsewhere.

The accompanying notes are an integral part of the Portfolios of Investments.

1 Depository receipts such as American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) and other country specific depository receipts are certificates evidencing ownership of shares of a foreign issuer. These certificates are issued by depository banks and generally trade on an established market in the U.S. or elsewhere.

Harbor International & Global Funds

NOTES TO PORTFOLIOS OF INVESTMENTS—January 31, 2021 (Unaudited)

NOTE 1—ORGANIZATIONAL MATTERS

Harbor Funds (the “Trust”) is registered under the Investment Company Act of 1940, as amended (the “Investment Company Act”), as an open-end management investment company. As of January 31, 2021, the Trust consists of 36 separate portfolios. The portfolios covered by this report are: Harbor Diversified International All Cap Fund, Harbor Emerging Markets Equity Fund, Harbor Focused International Fund, Harbor Global Leaders Fund, Harbor International Fund, Harbor International Growth Fund, Harbor International Small Cap Fund, and Harbor Overseas Fund (individually or collectively referred to as a “Fund” or the “Funds,” respectively). Harbor Capital Advisors, Inc. (“Harbor Capital”) is the investment adviser for the Funds.

NOTE 2—SIGNIFICANT ACCOUNTING POLICIES

Security Valuation

The Trust’s valuation procedures permit the Funds to use a variety of valuation methodologies, consider a number of subjective factors, analyze applicable facts and circumstances and, in general, exercise judgment, when valuing Fund investments. The methodology used for a specific type of investment may vary based on the circumstances and relevant considerations, including available market data.

Equity securities (including common stock, preferred stock, and convertible preferred stock), exchange-traded funds and financial derivative instruments (such as futures contracts, options contracts, including rights and warrants and centrally cleared swap agreements) that are traded or cleared on a national securities exchange or system (except securities listed on the National Association of Securities Dealers Automated Quotation (“NASDAQ”) system and United Kingdom securities) are valued at the last sale price on a national exchange or system on which they are principally traded or cleared as of the valuation date. Securities listed on the NASDAQ system or a United Kingdom exchange are valued at the official closing price of those securities. In the case of securities for which there are no sales on the valuation day, (i) securities traded principally on a U.S. exchange, including NASDAQ, are valued at the mean between the closing bid and ask price; and (ii) securities traded principally on a foreign exchange, including United Kingdom securities, are valued at the official bid price determined as of the close of the primary exchange. Securities of open-end registered investment companies that are held by a Fund are valued at net asset value. To the extent these securities are actively traded and fair valuation adjustments are not applied, they are normally categorized as Level 1 in the fair value hierarchy. Equity securities traded on inactive markets or valued by reference to similar instruments are normally categorized as Level 2 in the fair value hierarchy. For more information on the fair value hierarchy, please refer to the Fair Value Measurements and Disclosures section.

Short-term securities with a remaining maturity of less than 60 days at the time of acquisition that are held by a Fund are valued at amortized cost to the extent amortized cost represents fair value. Such securities are normally categorized as Level 2 in the fair value hierarchy.

Over-the-counter financial derivative instruments, such as forward currency contracts, options contracts, and swap agreements, derive their value from underlying asset prices, indices, reference rates and other inputs, or a combination of these factors. These instruments are valued using evaluated prices furnished by a pricing vendor selected by the Board of Trustees. In certain cases, when a valuation is not readily available from a pricing vendor, the Fund’s subadviser provides a valuation, typically using its own proprietary models. Depending on the instrument and the terms of the transaction, the value of the derivative instrument can be determined by a pricing vendor or subadviser using a series of techniques, including simulation pricing models. The pricing models use inputs, such as issuer details, indices, spreads, interest rates, yield curves, dividends and exchange rates, that are observed from actively quoted markets. Derivative instruments that use valuation techniques and inputs similar to those described above are normally categorized as Level 2 in the fair value hierarchy.

A Fund may also use fair value pricing if the value of some or all of the Fund’s securities have been materially affected by events occurring before the Fund’s pricing time but after the close of the primary markets or exchanges on which the security is traded. This most commonly occurs with foreign securities, but may occur with other securities as well. In such cases, the Fund may apply a fair value factor supplied by the pricing vendor to a foreign security’s market close value to reflect changes in value that may have occurred between the close of the primary market or exchange on which the security is traded and the Fund’s pricing time. That factor may be derived using observable inputs such as a comparison of the trading patterns of a foreign security to intraday trading in the U.S. markets that are highly correlated to the foreign security or other information that becomes available after the close of the foreign market on which the security principally traded. When fair value pricing is employed, the prices of securities used by a Fund to calculate its net asset value may differ from market quotations, official

closing prices or evaluated prices for the same securities, which means that the Fund may value those securities higher or lower than another given fund that uses market quotations, official closing prices or evaluated prices supplied by a pricing vendor in its calculation of net asset value. Securities valued using observable inputs, such as those described above, are normally categorized as Level 2 of the fair value hierarchy.

When reliable market quotations or evaluated prices supplied by a pricing vendor are not readily available or are not believed to accurately reflect fair value, securities are priced at their fair value as determined by the Trust's Valuation Committee (the "Valuation Committee") pursuant to procedures adopted, and subject to oversight, by the Board of Trustees. The Valuation Committee is comprised of a trustee and officers of the Trust and employees of Harbor Capital with relevant experience or responsibilities. Each security for which the Valuation Committee determines a fair value, including the basis for the fair value decision, is reviewed by the Board of Trustees at its regularly scheduled board meetings. Securities valued using fair valuation methods that incorporate significant unobservable inputs are normally categorized as Level 3 in the fair value hierarchy.

Fair Value Measurements and Disclosures

Various inputs may be used to determine the value of each Fund's investments, which are summarized in three broad categories defined as Level 1, Level 2, and Level 3. The inputs or methodologies used for valuing securities are not necessarily indicative of the risk associated with investing in those securities. The assignment of an investment to Levels 1, 2, or 3 is based on the lowest level of significant inputs used to determine its fair value.

Level 1—Quoted prices in active markets for identical securities.

Level 2—Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3—Significant unobservable inputs are used in situations where quoted prices or other observable inputs are not available or are deemed unreliable. Significant unobservable inputs may include each Fund's own assumptions.

The categorization of investments into Levels 1, 2, or 3, and a summary of significant unobservable inputs used for Level 3 investments, when applicable, can be found at the end of each Fund's Portfolio of Investments schedule. For fair valuations using significant unobservable inputs, if any, a reconciliation of the beginning to ending balances for reported fair values is provided at the end of each Fund's Portfolio of Investments schedule that presents changes attributable to realized and unrealized gains and losses and purchases, sales, and transfers in/out of the Level 3 category during the period.

Each Fund used observable inputs in its valuation methodologies whenever they were available and deemed reliable.

Securities Transactions

Securities transactions are accounted for on the trade date (the date the order to buy or sell is executed).

Please refer to the most recent annual or semi-annual reports on the Harbor Funds' website at harborfunds.com for more information regarding each Fund's significant accounting policies, investments, and related transactions.
